

Demographic Profile of Mexican Immigrants in the United States

1. Of the 39 million Latinos in the United States, _____% are of Mexican origin.
2. The average age of Mexican immigrants at entry into the U.S. is _____.
3. Among almost 2 families (with children) headed by a Mexican immigrant, _____ % are two-parent families.
4. 76% of Mexican immigrant males 18-64 years of age are workers in the _____.
5. ____ % of U.S. farm workers are Mexican immigrants.

Health Service Disparities among Mexican Immigrants

1. **True or False?** Mexican immigrants use fewer key preventive services than U.S. born Mexican Americans and non-Hispanic whites due to the coverage of services they carry over from their native country.
2. **True or False?** Pneumonia and influenza cause over 20,000 deaths annually in the U.S., primarily among the middle aged; yet in 2000 over half of Mexican immigrants age 65 and older had not gotten flu shots the previous year.
3. **True or False?** Oral health screening and prevention have significant payoffs in improved health and decrease costs, yet almost two-thirds of adult Mexican immigrants and half of U.S. born Mexican Americans had not gotten a dental exam in the past year.
4. **True or False?** Over one-quarter of adult Mexican immigrants had not seen a doctor in the previous two years, about 4 times the non-Hispanic white rate.
5. **True or False?** Breast cancer is common cancer among women in the U.S. In 2000, Mexican immigrant women age 40 and over were the least likely to have had a mammogram in the past two years.

Health Insurance Coverage in the United States: Latino Population

Choose the correct answer:

1. The foreign born U.S. population is about _____ times more likely to be uninsured than the native population: **A. 2 B. 2.5 C. 5 D. None of the above**
